Dear all –

Attached is my current draft. If anyone has any suggestions please let me know. It is an engineering crowd, so I didn't go into the affordability issue, and I don't cover all of the old headliner numbers (gallons fuel saved, GHG reductions, fuel saving \$s, etc.)

I have 30 minutes, and I haven't not done a dry run left – I am sure I have too many slides, but I'll figure that out.

Thanks
Bill
